First Office Action on the Merits

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 35-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Huibers et al. ('456).

Huibers et al. teach a residue obtained from a pitch after saponification comprising 0.06% by weight of citrostadienol (see the entire article, especially col. 12, Table B). The composition taught by the reference is encompassed by the instant claims.

Allowable Subject Matter

3. Claims 9-34 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 1616

The prior art does not teach or suggest the claimed process wherein a liquid phytosterol starting material obtained from the transesterification of a distillation residue with an alkanol is dissolved in hydrocarbon and crystallized therefrom. The closest prior art teaches crystallization of sterols from a blend of organic solvents such as hydrocarbon but does not teach maintaining the transesterification product in liquid form before said crystallization (see Hunt et al., WO 95/04731, see the entire article, especially page 26, example 7).

Telephone Inquiry

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara P. Badio, Ph.D. whose telephone number is 703-308-4595. The examiner can normally be reached on M-F from 7:30am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees can be reached on 703-308-4628. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556 for regular communications and 703-308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
